

# EmotiVision – Giving Emotions to Everyday Objects

An AI-powered app that inspires reuse awareness through engaging storytelling.

Presented by: Your Team Name

**PB** by Pooja Budhival

Made with **GAMMA**

# What if Objects Could Talk?

- Plastic bottle tells its unique story
- Invites second chance for reuse
- Creates emotional connection with users
- Asks gently: “Please don’t throw me away!”

Imagine objects sharing memories and hopes.

# The Problem

## Careless disposal

People throw without thinking

## No emotional bond

Objects seen as trash, not value

## Kids unaware

Lack of reuse education

## Environmental harm

Sustainability and creativity lost

# Our Solution – EmotiVision

## AI enables object detection

Identify everyday items instantly

## Emotional story generation

Objects 'talk' about their past and future

## Creative reuse ideas

Suggest upcycling projects

## Augmented Reality visuals

Bring objects alive with expressions

# Educational Value for Kids

## Empathy through stories

Kids connect emotionally with objects

## Eco-friendly mindset

Cultivates sustainability awareness

## School integration

Enhances learning & creativity

## Home reuse

Encourages creative object repurposing

# Key Features of EmotiVision

Object Detection

AI Story Generation

Emotional Voice

Reuse Suggestions

AR Visuals

# Real-World Impact

1

## Emotional bond

Fosters care, reduces waste

2

## Promotes reuse

Keeps items out of landfill

3

## Mindful consumption

Encourages thoughtful choices

4

## Inspires kids

Future sustainability champions

# Reuse, Not Refuse

Every bottle has feelings and a story.

EmotiVision gives waste a voice and second chance.

Thank you! 🙏
